---	--

At AC3, 129 species of Procellariiformes were assessed using a number of categories in order to provide Parties with an approximate priority list of new species that might be considered for nomination to Annex 1 of ACAP ([AC3 Doc 18](#)). Following discussions at AC8, six of the original eight categories were retained and the scoring system was adopted by the 5th session of the Meeting of Parties ([MoP5 Doc 21](#)). Subsequent to MoP5, the at-sea threats and migratory nature scores for all species were reviewed ([SBWG7 Doc 25](#)). The review recommended updates to those scores for 15 species, and noted the need for clarification regarding the categorization of at-sea threats, as well as the overlap between some of the categories.

AC8 also asked the Taxonomy Working Group (TWG) to recommend a standard taxonomy to be used when considering new species for Annex 1 and for other ACAP purposes. At AC10, the TWG recommended the use of the International Ornithological Congress (IOC) listing based on its use of the widest evidence base and peer review process ([AC10 Doc 22 Rev 1](#)). AC10 endorsed this recommendation and advised MoP6 accordingly. The taxonomic treatment used currently for species already listed on Annex 1 remains unchanged (*Thalassarche steadi* remains on the list as a full species).

Table 1 lists all procellariiform species according to IOC World Bird List v9.1 taxonomy, together with the scores assigned to assess their suitability and priority for listing on Annex 1 of the Agreement. This list incorporates the updated scores recommended in **SBWG7 Doc 25** as well as updates to the IUCN and CMS status of species since MoP5 (May 2015). The Seabird Bycatch Working Group and the Population and Conservation Status Working Group will now work to address the issues identified in **SBWG7 Doc 25** and present a revised list at AC12.

Table 1. List of Procellariiformes following IOC World Bird List v9.1^{1,2}, sorted by suitability of species for inclusion on Annex 1 of the Agreement (descending total weighted score with at-sea threats double weighted). Asterisks and red font indicate species already listed on Annex 1. Cells highlighted in yellow indicate changes and new additions since **MoP5 Doc 21**.

Common name	Scientific name	IUCN ³ status	CMS ⁴ listing	Endemism	Migratory	Land-based threats	At-sea threats	Weighted Total
